NASH™ SEATING

Overview

Planning

Statement of Line	➤ See page NH.2
Planning	NH.3
Pricing	NH.4
Surface Materials	NH.5

Steam-bent frame is constructed of kiln-dried European beech to support the body's curves.

Joints are securely fastened with mortise and tenon joinery or double-doweled construction to ensure long-term use.

Wall-saver legs flare slightly so they contact the baseboard first, saving the wall's finish.

Cleanout is standard to make cleaning easy and simple.

Seat rails are reinforced with wood corner blocks and cleats attached with glued and wood screws.

Nylon glides are $\frac{7}{8}$ " in diameter.

Brushed aluminum foot rail protector is standard on front rails of Nash bar stools.

Seat suspension is constructed of $\frac{9}{32}$ "-thick molded plywood that is machined to form an open perimeter. Unidirectional webbing is machine-stretched across the open perimeter and stapled to the edges to form a secure suspension.

Seat assembly is attached with wood screws to wood cleats on the frame.

Seat cushion is made of $1\frac{1}{4}$ " thin-profile, high-resiliency, CFC-free foam for maximum comfort and durability.

Seat textiles or leather are wrapped over the seat cushion and secured to the seat suspension with upholstery staples.

Contrasting textiles or leather on backs and seats are available on Nash guest chairs. If different price grades are selected, use our electronic specification tool for accurate pricing.

Tips

Due to the three-dimensional design of back and arms, horizontal stripes are not recommended as they will appear wavy across the back.

Contrasting textiles or leather are available with Kimball textiles or leather, COM, COL, or Alliance Program textiles. Use an electronic specification tool for accurate pricing.

Thin, thick, or stiff materials may result in gathers and puckers at corners, contours, and seams.

IMPORTANT: Orders cannot be cancelled for chairs specified with Alliance Program textiles.

Models that meet TB133 requirements are available in select textiles and leather.

Kimball has analyzed each model to most accurately reflect the COM/COL yardage requirements shown on the pricing pages. The yardage requirement for each model is based on 54"W textile and cutting the textile up the roll.

For widths other than 54", increase the yardage requirement by the factors below:

<i>Textile width</i>	<i>Increase yardage</i>
50"-53"	15%
48"-49"	30%
45"-47"	45%

If repeat is larger than 18", contact Customer Service to confirm the correct amount of yardage required.

When ordering 10 or more chairs in the same COM, yardage requirements may be reduced.
